

Product Sheet: Climbing Gear

1. Pro Gear 123 Climbing Shoes

- **Category:** Footwear
- **Description:** The Pro Gear 123 Climbing Shoes are designed for both beginners and advanced climbers. With a snug fit and high-friction rubber soles, they provide excellent grip on all types of surfaces. The shoes feature a synthetic upper that molds to your feet over time, ensuring comfort and performance. Ideal for bouldering and sport climbing.
- **Specifications:**
 - **Material:** Synthetic upper, high-friction rubber sole
 - **Weight:** 400 grams per shoe
 - **Closure Type:** Velcro
 - **Available Sizes:** 5-13 (US)
 - **Colors:** Black, Red, Blue

2. UltraClip Carabiner

- **Category:** Hardware
- **Description:** The UltraClip Carabiner is a lightweight and durable carabiner designed for all types of climbing. It features a keylock nose that prevents snagging and a smooth gate operation for quick and secure clipping. Tested to withstand high loads, it is a reliable choice for lead climbing, belaying, and rappelling.
- **Specifications:**
 - **Material:** Aluminum alloy
 - **Weight:** 50 grams
 - **Gate Opening:** 21mm
 - **Strength:** 24 kN (major axis), 8 kN (minor axis), 7 kN (open gate)
 - **Colors:** Silver, Black

3. StrongRope 500

- **Category:** Ropes
- **Description:** The StrongRope 500 is a dynamic climbing rope designed for various climbing disciplines, including sport climbing, trad climbing, and alpine climbing. It offers excellent durability, handling, and impact absorption. The rope has a middle mark for easy identification and is treated for water and abrasion resistance.
- **Specifications:**
 - **Diameter:** 9.8mm
 - **Length:** 60m, 70m, 80m

- **Weight:** 64 grams per meter
- **Impact Force:** 8.5 kN
- **UIAA Falls:** 7
- **Treatment:** Dry treated for water resistance

4. ClimbSafe Harness

- **Category:** Harnesses
- **Description:** The ClimbSafe Harness is an all-around harness suitable for various climbing activities, including gym climbing, sport climbing, and multi-pitch trad routes. It features adjustable leg loops and a wide, padded waistbelt for comfort during long climbs. The harness includes four gear loops and a haul loop for carrying essential equipment.
- **Specifications:**
 - **Material:** Nylon, EVA foam padding
 - **Weight:** 350 grams
 - **Gear Loops:** 4
 - **Haul Loop:** Yes
 - **Adjustment:** Buckle system for waist and leg loops
 - **Sizes:** S, M, L, XL

5. GripMaster Chalk Bag

- **Category:** Accessories
- **Description:** The GripMaster Chalk Bag is a convenient and stylish way to keep your chalk handy during climbs. It features a fleece-lined interior to keep chalk contained and dry, a drawstring closure to prevent spills, and a zippered pocket for small essentials like keys or an energy gel. The bag also comes with a belt and a brush holder.
- **Specifications:**
 - **Material:** Polyester, fleece lining
 - **Weight:** 80 grams
 - **Volume:** 1.5 liters
 - **Pocket:** Zippered pocket for accessories
 - **Colors:** Green, Blue, Black

6. RockShield Helmet

- **Category:** Helmets
- **Description:** The RockShield Helmet is designed for maximum protection and comfort during climbing activities. It features a durable ABS shell with an EPS foam liner that

absorbs impacts, ensuring your safety in case of falls or rockfalls. The helmet has an adjustable fit system, ventilation holes, and a headlamp attachment for climbing in low-light conditions.

- **Specifications:**
 - **Material:** ABS shell, EPS foam liner
 - **Weight:** 280 grams
 - **Ventilation:** 10 air vents
 - **Fit System:** Adjustable dial
 - **Headlamp Attachment:** Yes
 - **Sizes:** S/M, M/L
 - **Colors:** White, Orange, Blue

7. QuickClip Carabiner

- **Category:** Hardware
- **Description:** The QuickClip Carabiner is a compact and lightweight carabiner designed for quickdraws and other climbing applications. Its compact size and smooth gate action make it easy to clip and unclip during climbs. It is constructed from high-strength aluminum, making it both lightweight and durable.
- **Specifications:**
 - **Material:** Aluminum
 - **Weight:** 40 grams
 - **Gate Opening:** 20mm
 - **Strength:** 22 kN (major axis), 7 kN (minor axis), 6 kN (open gate)
 - **Colors:** Red, Blue, Green

8. SummitX Climbing Shoes

- **Category:** Footwear
- **Description:** The SummitX Climbing Shoes are built for technical climbs where precision and performance are key. These shoes feature an aggressive downturn, sticky rubber soles, and a tight fit to ensure maximum control on small holds. The leather upper stretches over time for a custom fit, making these shoes ideal for advanced climbers.
- **Specifications:**
 - **Material:** Leather upper, sticky rubber sole
 - **Weight:** 450 grams per shoe
 - **Closure Type:** Lace-up

- **Available Sizes:** 5-12 (US)
- **Colors:** Yellow, Black

9. ProGrip Chalk

- **Category:** Accessories
- **Description:** ProGrip Chalk is a premium chalk blend that provides superior grip and moisture absorption, essential for climbing in humid or sweaty conditions. It comes in a resealable bag, ensuring the chalk remains dry and ready to use. Suitable for all types of climbing, from bouldering to high-altitude ascents.
- **Specifications:**
 - **Material:** Magnesium carbonate
 - **Weight:** 100 grams, 200 grams
 - **Packaging:** Resealable bag
 - **Additional Features:** Available in loose powder or chalk ball

10. SecureBelay Device

- **Category:** Hardware
- **Description:** The SecureBelay Device is a versatile and easy-to-use belay device suitable for beginners and experienced climbers alike. It offers smooth rope handling, controlled descent, and compatibility with a wide range of rope diameters. The device is also suitable for rappelling and can be used with single or double ropes.
- **Specifications:**
 - **Material:** Aluminum
 - **Weight:** 75 grams
 - **Rope Compatibility:** 8.5mm - 11mm
 - **Features:** Auto-locking, smooth descent control
 - **Colors:** Grey, Blue

11. QuickLink Quickdraw Set

- **Category:** Hardware
- **Description:** The QuickLink Quickdraw Set is a set of six quickdraws, perfect for sport climbing. Each quickdraw features a straight-gate carabiner on one end and a bent-gate carabiner on the other, connected by a durable and lightweight nylon dogbone. These quickdraws are designed for easy clipping and reduced rope drag.
- **Specifications:**
 - **Material:** Aluminum carabiners, nylon dogbone
 - **Length:** 12cm, 18cm

- **Weight:** 100 grams per quickdraw
- **Strength:** 25 kN (carabiners), 22 kN (dogbone)
- **Colors:** Assorted

12. ClimbMate Ascender

- **Category:** Hardware
- **Description:** The ClimbMate Ascender is a high-quality, ergonomic ascender designed for rope climbing, rescue, and caving. It features a comfortable grip, a smooth cam mechanism that prevents rope damage, and an easy-to-operate thumb catch. Ideal for use on fixed ropes in a variety of climbing situations.
- **Specifications:**
 - **Material:** Aluminum alloy, rubber grip
 - **Weight:** 150 grams
 - **Rope Compatibility:** 8mm - 13mm
 - **Features:** Ergonomic grip, self-cleaning cam
 - **Colors:** Black, Orange

13. HighPeak Sleeping Bag

- **Category:** Camping Equipment
- **Description:** The HighPeak Sleeping Bag is designed for cold weather expeditions. It features a mummy shape to retain heat, high-loft insulation, and a water-resistant shell to keep you dry in damp conditions. The sleeping bag includes a draft collar, a two-way zipper, and a compression sack for easy packing.
- **Specifications:**
 - **Material:** Ripstop nylon shell, synthetic insulation
 - **Temperature Rating:** -10°C (14°F)
 - **Weight:** 1.2 kg
 - **Length:** Regular (6'0"), Long (6'6")
 - **Colors:** Green, Grey

14. TrailBlazer Trekking Poles

- **Category:** Trekking Poles
- **Description:** The TrailBlazer Trekking Poles are lightweight, adjustable poles designed for hiking and trekking. They feature a durable aluminum shaft, a comfortable cork grip, and an anti-shock system
